Re: January 29, 2007 Notification of Self Implementing Cleanup and Disposal of Polychlorinated Biphenyl Waste at Building 116 AL#01 and AL#02 in Investigation Area C2, Eastern Early Transfer Parcel, Mare Island, Vallejo, California

Dear Mr. Farley:

EPA has reviewed your January 29, 2007 notification regarding the above referenced site. EPA concurs with your cleanup proposal.

The site is a former transformer room attached to building 116. Building 116 AL#01 is the concrete floor, walls, electrical boxes and conduits associated with the transformers, and the site designated building 116 AL#02 is the floor drain and underlying soils. Following Navy cleanup actions the maximum remaining concentrations of PCBs at the two sites are 923 mg/kg PCBs in concrete and 4.5 mg/kg PCBs in soils. CH2M Hill intends to demolish the structure and excavate the contaminated soils to ensure that the 1 mg/kg cleanup goal has been met.

Please feel free to contact Carolyn d'Almeida (415-972-3150) if you have any questions about this letter.

Sincerely,

A handwritten signature in black ink, appearing to read "Kathleen Johnson", is written over a horizontal line.

Kathleen Johnson
